AUSTRALIA NATIONAL CONSTRUCTION CODES, REGULATIONS AND COMPLIANCE

**Fully Accredited
By:**

Chartered Institute of
Professional Certifications

CPD
Certification Service

PROGRAM OVERVIEW

The Australia building and construction codes set a foundation to create a quality and safe design to Australia's buildings. Failure to comply with these codes can cause your organization reputational woes, loss of lucrative building projects and construction opportunities or even lead to criminal charges as well. It is essential that you fully understand these regulated codes and standards every time you lay your hands on a building and construction project.

Led by Brad Hoad, an award-winning qualified building trainer and consultant, this program will show you a thorough review of the **Australia's National Construction Code (NCC) and Australian Standards (AS)** and an in-depth understanding of the legal and compliance requirements of building and construction projects in Australia. You will dive deep on how to **interpret the key provisions of the building code** and access the NCC to ensure compliance with the performance requirements that are essential for your building projects. Throughout the program, you will be taught **options or pathways for compliance**, especially for more challenging codes to abide with and develop a robust performance solution that will prevent you from breaching the legislation and avoid any reputational woes. At the end of the program, you will master all the critical building codes and construction standards to ensure that your **building projects are aligned within the legal frameworks**.

Post completion of the program, you will be awarded with the **Certification in Australia National Construction Codes, Regulations and Compliance** that can be used in your professional credentials. This certification is industry-recognized with lifelong validity and will help you distinguish your skillsets and show that you have attained expertise and critical knowledge in Australia's National Construction Code.

ACCREDITATIONS

4.8
