PROGRAM OVERVIEW

Agile project management has become one of the most popular approaches in recent years due to its ability to deliver **higher quality products**, **reduce the risk of building the wrong product**, and increase visibility into project progress. This **iterative and incremental** approach is particularly valuable in today's fast-paced business environment, where organizations are facing rapid-to-market deadlines, shifting priorities, and a need for flexibility. As a result, more and more organizations are adopting Agile methodologies to meet these challenges and improve project delivery.

This **Certified Agile Project Leader (CAPL™)** program is designed to equip you with the key foundation of integrating Agile approach to your project management cycle to **improve service delivery, improve employee and customer satisfaction**. You will learn the different types of Agile frameworks such as Scrum and Kanban while **determine which Agile method will work best for each project and be able to assess and monitor improvement in overall service delivery**. By understanding the key principles of Agile framework, you will be able to learn how to adopt an Agile mindset while **create a high-performing Agile team** to unlock your employees' intrinsic motivation. Besides that, you will gain the ability to **split large work items into smaller deliverables and using Agile methods for work estimation and forecasting**. Lastly, this program will help you to leverage innovation strategically to maximize value and limit cost through Agile implementation.

By the end of the program and upon passing the Chartered exam, you will have earned the **Certified Agile Project Leader (CAPL™)** designation which you can use to demonstrate your professional credentials and track record in effectively managing projects with agile methodologies.

Globally demanded and recognized, this designation is an industry-recognized trademarked charter developed by the **Chartered Institute of Professional Certifications** and has lifelong validity. It's also fully accredited by CIPD (Chartered Institute of Personnel and Development), with 160,000 membership organizations worldwide.
